

NERC COMPLIANCE AND TRAINING SERVICES

Let **Applied Professional Training's (APT)** accreditation and experience help you comply with NERC's Personnel Performance Training (PER-005), Critical Infrastructure Protection (CIP), Pre-Audit reviews and general Compliance. **APT** has assessed, analyzed, implemented, monitored and tracked education programs including Best Practices, Job Task Analysis, Training Needs Assessments, Gap Analysis, Learning Management System (LMS) plus Consulting Services that include Information Technology training where cyber security is essential. Since 1993, **APT** has provided high quality education services to electric power and telecommunications companies nationally and internationally.

APT's experienced NERC standards staff helps assure compliance using proven tools that enable clients to self monitor and control desired outcomes. Let **APT's** expertise design a compliance manual equipped with a standards matrix, implementation plans, schedules, milestones, monitoring and evaluation reports geared to NERC compliance readiness. **APT's** degree granting accreditation by the US Dept of Education enables us to combine NERC's mandatory training requirements with college degree and certificate programs that are designed especially for today's System Operators.
